

ABSTRATC

Zero Koin is a Binance Smart Chain (BSC)-based utility token built to integrate education, Web3 tools, and reward systems into a single decentralized platform. It aims to bridge the gap between learning and real-world crypto use by rewarding user engagement with educational content and decentralized tools.

INTRODUCTION

Zero Koin introduces a reward-driven ecosystem where users earn daily by participating in blockchain-based learning, using crypto utilities, and engaging with a Web3 DApp. It empowers individuals to grow their crypto knowledge while earning from it.

VISION & MISSION

Vision:

To build a self-sustaining, utility-first ecosystem where education and decentralized tools are accessible to all.

Mission:

To decentralize learning, reward meaningful user participation, and empower the global community with innovative crypto tools.

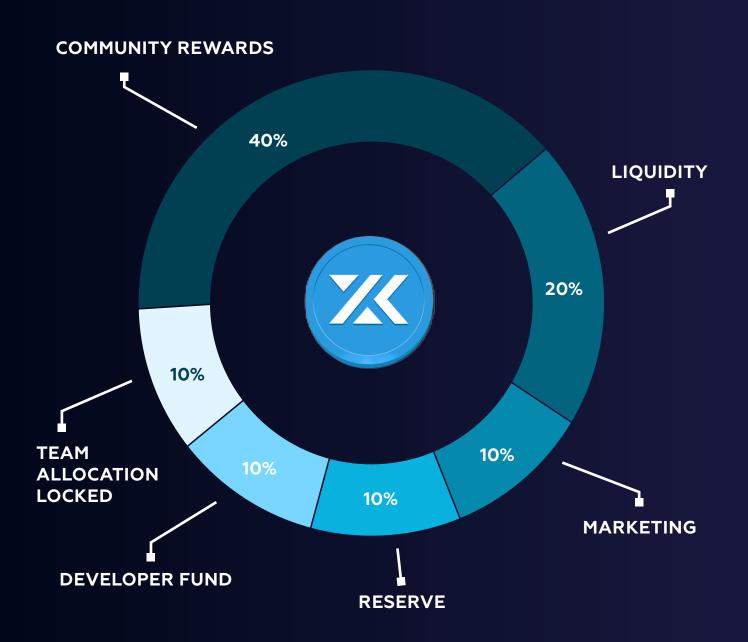

KEY FEATURES

TOKEN OVERVIEW

| Token Name | Zero Koin |
|--------------|------------------------------|
| Symbol | ZEROKOIN |
| Total Supply | 2.5 Billion ZEROKOIN |
| Blockchain | Binance Smart Chain (BEP-20) |
| Pair | ZEROKOIN/USDT |

SECURITY & AUDITS

- Liquidity will be locked on PancakeSwap V2
- Third-party smart contract audit will be conducted POST launch
- Ongoing security monitoring post-launch

ZerokWallet is our upcoming flagship product, set to launch by the end of 2027. Inspired by leading decentralized wallets like Trust Wallet, ZerokWallet aims to redefine how users interact with the blockchain combining simplicity, security, and seamless integration within the Zero Koin ecosystem.

Key Features

1. Multi-Chain Support:

Seamlessly store, send, and receive tokens across major blockchains including BSC, Ethereum, Solana, Polygon, and more.

2. Zero Koin Ecosystem Integration:

Direct access to Zero Koin mining rewards, referral bonuses, and Web3 learning incentives — all in one wallet.

3. In-App DApp Browser: Explore and interact with decentralized applications (DApps) such as DeFi protocols, NFT marketplaces, and GameFi platforms.

4. Built-In Token Swap & Staking:

Swap tokens within the wallet and participate in staking pools to earn passive rewards.

5. Military-Grade Security:

Non-custodial architecture with encrypted private keys, biometric authentication, and secure recovery mechanisms.

6. Portfolio Tracking & Analytics:

Get real-time data on asset performance, wallet balance, and historical transactions — empowering users with smart financial insights.

7. User-Centric Design:

A minimalistic and intuitive interface designed for both beginners and crypto veterans.

VISION

ZerokWallet is not just a wallet — it's a bridge to true financial freedom. Our vision is to empower users globally by providing them full control over their digital assets, education-based rewards, and participation in the Web3 revolution — all through a single, unified application.

TEAM & COMMUNITY

Zero Koin is built by a team of developers, educators, and Web3 enthusiasts. As a community-first project, transparency and inclusiveness are core principles. Core team bios and KYC status will be available on the official website at launch.
